System Requirements For Photo To PSP:

If your computer is new, and your monitor is not being used with a wide variety of other programs, and your computer has a fairly fast processor, it should run most games ok. If your computer is older, or you use a monitor with a wide variety of other programs, or your computer processor is slower than your average, it may not be possible to run the game at the normal framerate and/or quality settings. If you want to play at the normal settings, then your computer needs to be able to run the game at those settings. To get the best
